

The **TINY-FOGGER**

The tiniest fog generator in the world.

Manufactured for
Look – SOLUTIONS MADE IN GERMANY

battery fog generator

programmable

can be easily build into
costumes, props etc.

Made in Germany

This fog generator is called tiny, and its dimensions truly are tiny. In a small package (L=91, W=34, H=61 mm) technology of outstanding performance has been realised.

The Idea

In the field of special effects, equipment for theatre, mega musicals and movies, individual solutions for placing fog effects are often needed. Until now many great ideas have failed due to the size, lack of flexibility and price.

The Solution

The **TINY-FOGGER** is a fog generator that fills this gap, due to its small size and its programmability.

• Generator

Because of its dimensions and weight (of less than 300 grams), this little gadget can be easily built into backdrops, puppets, costumes and props etc.

The heart of the generator is a programmable microprocessor which controls fog emission. State of the Art technology opens a wide field of applications to the user.

For some applications it will be useful to program in a fixed fog amount. This can be done directly at the machine. The programmed fog amount can easily be reproduced and/or changed.

A compact battery supplies the TINY-FOGGER with the 12V supply. The modular design of fog generator and separate rechargeable battery ensure utmost flexibility for individual uses.

Because of an intelligent control mechanism the battery supplies energy only when necessary. Thus the fog time is greatly increased compared to other battery powered machines.

• Control

The **TINY-FOGGER** is triggered with a small remote.

Also you can trigger the machine with a radio remote (option) or directly at the machine.

• Fluid

The fluid tank is attached externally, depending on the application, this tank can vary in both size and also distance from the machine.

A special fluid ensures dense fog is produced with the lowest of fluid consumption.

The battery and the fluid tank are so small that they can also be built within sets and costumes too.

• Service

The Vaporiser can be easily changed by the user on site.

Technical datas

Procedure	vaporizing fog generator
Power requirement	70 Watt
Voltage	12 V battery
Warm up time	0.5 sec.
Fluid tank capacity	50 ml
Fogging time	programmable
Continuous output with battery	10 min
Control	cable remote radio remote (optional)
Temperature control	Microprocessor
Dimensions TINY-FOGGER (L x W x H)	9.1 x 3.4 x 5.1 cm
Weight TINY-FOGGER	< 300 g
Dimensions battery (L x W x H)	18 x 2.2 x 6.1 cm
Weight battery	approx. 650 g

Dimensions

Advantages

- Very small dimensions
- Battery supplies energy only when necessary
- Warm up time less than 1 sec.
- Continuous output
- Fogging time programmable
- Simple controls
- Trigger with remote and optionally with radio remote
- Case for transport
- Manufactured in Germany

Package includes

- TINY-FOGGER
- Battery
- Charger
- Programmable remote
- Fluid tank
- 250 ml Fluid
- Carry case

Accessories

- Radio remote
- Duct adaptor
- Y-Splitter
- Hose Ø 15 mm
- Timer
- DMX-Converter

Service

Based on the strong partnership with the German manufacturer OTTEC Technology GmbH, Look Solutions is able to provide a quick and easy service which guarantees the high quality of all products with the motto „innovation by communication“.
